

# Introducing Pectus Pro-S

## Pectus Carinatum Orthosis

### You asked, we listened.

The new **Pectus Pro-S** offers the same effective compression forces for Pectus Carinatum and other chest anomalies as our original orthosis, now redesigned for smaller patients. With shorter adjustment bars, a smaller back panel, and improved comfort, it's ideal for chest sizes ranging from **63–102 cm**.

#### Pectus Pro-S Features

Smaller chest size range of 63-102cm.

Direct anterior-posterior corrective compression forces.

Durable ratchet closure.

2.5" of lateral adjustment for Asymmetric Pectus Carinatum.

Black anodised slide adjustment bars and screws.

Optional, soft shoulder straps included.

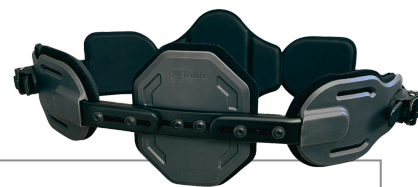

Removable, breathable, washable pads.
